

Table of Contents
Bulletin of the Malaysian Mathematical Sciences Society
Volume 35 • Number 2A • 2012

- 1. The 5th Asian Mathematical Conference**
See Keong Lee and Ahmad Izani Md. Ismail
- 2. Difference Sets and Sequences**
Siu Lun Ma
- 3. Two-Fluid Nonlinear Mathematical Model for Pulsatile Blood Flow Through Stenosed Arteries**
D. S. Sankar
- 4. On the Commutant of Certain Operators in the Bergman Space**
Ali Abkar
- 5. On Parametric Random Truncation Models**
Vasiliy Kim and Gerrit Eichner
- 6. Application of Adaptive Finite Element Method for Elliptic Partial Differential Equations to the Laplace Beltrami Operator on Graphs**
Khamron Mekchay
- 7. Sharp Remainder Terms of the Rellich Inequality and its Application**
Alnar Detalla, Toshio Horiuchi and Hiroshi Ando
- 8. On Azumaya Crossed Products**
George Szeto
- 9. The Bounded Convergence Theorem for Riesz Space-Valued Choquet Integrals**
Jun Kawabe
- 10. 3-Point Implicit Block Multistep Method for the Solution of First Order ODEs**
S. Mehrkanoon, Z. A. Majid, M. Suleiman, K. I. Othman and Z. B. Ibrahim
- 11. On Contractions and Invariants of Leibniz Algebras**
Isamiddin S. Rakhimov and Kamel A. Mohd. Atan

12. Classes of Nonrigid Carnot Groups

Alessandro Ottazzi

13. A Summary on Pricing American Call Options Under the Assumption of a Lognormal Framework in the Korn-Rogers Model

Susanne Kruse and Marlene Müller

14. On Azumaya Galois Extensions

Lianyong Xue

15. The Sum of a Linear and a Linear Fractional Function: Pseudoconvexity on the Nonnegative Orthant and Solution Methods

Laura Martein and Laura Carosi
